

LEAN “KNOWLEDGE SHARING” ROUNDTABLE

*Have you been implementing Lean in your organization and experiencing pain and problems? **Everyone does.** MassMEP and the Associated Industries of Massachusetts invite you to come and share your experiences, your triumphs and your failures with your fellow Lean implementers. This is not a seminar, or a training session, but the beginning of an ongoing opportunity to:*

- *Tour a plant and “kick the tires”*
- *Learn some best practices*
- *Hear an overview of relevant Lean activities*
- *Share war stories*

MassMEP and A.I.M., co-sponsors of this event, thank General Dynamics C-4 Systems for opening their doors to allow others to see how a Lean enterprise spells success.

Other locations to follow.

Lean Manufacturing Roundtable Details
