

Recover Tax Dollars from Your Investment in Research and Development

Many business executives are not aware that the government has enacted tax changes that help them recover cash based on day to day activities.

What it is

In 2001, as an economic investment incentive, the Federal Government expanded the R&D Tax Credit laws allowing businesses an opportunity to recoup a portion of their business expenses for activities related to business and product improvement for their open tax years (generally the last four filing years.)

Who we are

Axiom Solutions, one of the nations leading Tax Credit Services firms, has developed a valuable set of Tax Credit Services to businesses—accessing R&D Tax Credits. Axiom works closely with the Mass MEP to identify companies that can benefit from this opportunity.

Our service applies business process engineering and R&D Tax accounting expertise to identify, quantify and substantiate activities that qualify for Federal and State Tax Credits. Axiom has helped hundreds of companies recover millions of dollars in credits.

Axiom has developed a deep knowledge base across dozens of industries. Targeting mid-market companies, we leverage our experience to maximize the R&D Tax Credit in a way that is fully compliant with the current tax regulations. Our skill sets include some of the industry's most experienced and talented tax professionals, business analysts and engineers.

How it works

Our proven approach makes the process of recovering your R&D Credit dollars efficient and risk-free. We work closely with your team to identify qualifying activities in a non-obtrusive yet comprehensive method. We perform the calculations, create the supporting documentation and work with your financial partners to insure the proper filing of the returns. Above all, we insure that your project will be managed with the highest integrity.

The average credit is substantial—hundreds of thousands of dollars! If your business is improving its products or processes to compete in today's marketplace, chances are good that you qualify for tax credits. Please take advantage of the opportunity to discuss how your company can benefit from this valuable service. For more information, please contact:
