

Facilities Engineer

OFS has one of the longest and most respectable corporate lineages in American business, which goes back to Alexander Graham Bell and the invention of the telephone more than a century ago. Our mission is to provide leading optical innovations and solutions by designing, manufacturing and supplying the best optical fibers, fiber cable and components for our customers' optical infrastructure, with exceptional service that creates value for our shareholders, customers and employees. To do so, we must continue shaping the future of communications by applying the best minds to the challenges our customers will continually face.

We currently seek a Facilities Engineer to support our Sturbridge, MA facility.

Primary Responsibilities:

- Direct Supervision of the Plant Services Maintenance, Manufacturing Systems Maintenance, and Systems Equipment employees
- Manage the design, planning, construction and maintenance of equipment, machinery, buildings, and other facilities located in Sturbridge.
- Plan, budget, and schedule facility modifications, including estimates on equipment, labor, materials and other related costs.
- Design and develop organizational policies relevant to the facilities department.
- Oversee the coordination of building space allocation and layout, communication services and facilities expansion.
- Hire, train, assign and check work of subordinates as to company policy and procedures, methods and practices, standards of performance and other matters affecting their work. Detect substandard work and take corrective action within the limits of established policy. Evaluate performance and confer with Equipment & Facilities Manager on personnel or other matters effecting subordinates.
- Perform other similar duties inherent to the position of Facilities Engineer, or as requested by Equipment & Facilities Manager.

Essential Skills and Qualifications:

- BS degree in Electrical or Mechanical Engineering or other Technical Field preferred
- 3-5 years in related position(s) or field(s) required
- Proficient in MS software platform, especially Excel preferred
- Strong team player, communicator, and willingness to learn required
- Strong understanding of the interconnects of the business processes employed and willingness to look for ways to continually improve them required

Qualified candidates may please forward resumes, which must include salary information, to:
