

Job Opportunities

Machinist, Barbour Stockwell Incorporated, Woburn, MA

[Barbour Stockwell](#) is a world leader in providing the test equipment or test services to confirm the integrity of critical rotating components, from EV Motor rotors to Aircraft Engine rotor disks. The company is seeking a Machinist. A successful candidate will be a motivated person with good work ethic, someone that enjoys a challenge, and has a desire to join a company for long term employment.

Qualifications

Must have:

- Ability to read engineering prints.
- Ability to read a micrometer to 0.0001-inch resolution.
- Basic Understanding of machining practices.
- Basic Understanding of different types of metals (aluminum, steel, titanium, etc.).
- Trade school training or on-the-job training.

Would like:

- Experience with manual machines – especially lathes.
- Experience with Southwestern Automated machines.
- 5-10 years experience.
- Familiarity with grinding – surface and cylindrical.
- Familiarity with honing.

Working hours:

- 40 hours per week
- Starting time: Flexible (7:00-9:00 AM)
- Lunch – 30 minutes (unpaid)
